DIRECT BOOKING PERFORMANCE REPORT · OCTOBER 2026

Chateau Du Village Patong

Triptease paid media and rate parity, October 2026. All money figures in Thai baht. Triptease reporting starts 1 October 2026.

Against October 2025, bookings fell from 48 to 9 and booking value roughly halved, almost all of it on Metasearch, where about 43 bookings became 5 as clicks cost nearly twice as much and converted a third as often. A cheaper price still sat beside the hotel website on 91% of Google Hotel Ads stays, led by Trip.com.

฿87,855
booking value from 9 bookings
41.8% of website revenue · Sep 2026: ฿12,413 · Oct 2025: ฿170,750

฿18,949
ad spend
67% of the ฿28,180 budget · Sep 2026: ฿11,831 · Oct 2025: ฿24,471

4.6x
return on ad spend
฿2,105 per booking · 822 clicks · Sep 2026: 1.0x · Oct 2025: 7.0x

90.7%
High (over 30%)
of Google Hotel Ads stays where an OTA or reseller undercut the hotel website
2,098 of 2,312 stays · Sep 2026: 99.7% · Trip.com alone: 81%

By channel

Where the money went and what came back, with the return in September 2026.

CHANNEL	SPENT	BUDGET USED	CLICKS	BOOKINGS	BOOKING VALUE	RETURN	RETURN SEP 2026
Metasearch	฿9,154	69%	228	5	**฿10,555**	**1.2x**	9.4x
Paid Search	฿9,605	86%	572	4	**฿77,300**	**8.0x**	0.0x
Retargeting	฿190	5%	22	0	**฿0**	**0.0x**	1.0x

Metasearch against October 2025: cost per click ฿21.52 → ฿40.15, conversion 6.82% → 2.19%, bookings 42.6 → 5 (as reported by Triptease).

Rate parity: hotel website vs OTAs

Recorded prices for 1-night stays, compared with September 2026.

● **Red** = an OTA or reseller was cheaper than the hotel website, a booking the website can lose. ● **Green** = none was cheaper. How often an OTA or reseller was cheaper (one OTA, or all together): **Low** 0–10% · **Medium** over 10–30% · **High** over 30%.

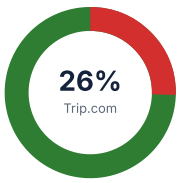

Google Hotel Ads

● **90.7% OTA or reseller cheaper**: on 2,098 of 2,312 stays, at least one showed a lower price than the hotel website

● **9.3% none cheaper**: no OTA or reseller was below the hotel website

When cheaper, typically ฿772 a night (18%) below the hotel website · Sep 2026: ฿765 a night (20%) · Oct 2025: 36%

Sep 2026: OTA or reseller cheaper on 99.7%

Hotel booking engine

Guests who searched dates in the hotel's booking engine. Each OTA's share covers the searches where Triptease compared its price for the same stay.

● **26% Trip.com cheaper** than the hotel website: 47 of 178 searches

● **74% Trip.com not cheaper**

Trip.com was the OTA cheaper most often; every OTA is on page 2.

When cheaper, typically 9% below the hotel website

Sep 2026: Trip.com cheaper on 13%

Google Hotel Ads: each OTA vs the hotel website

Share of stays where the OTA showed a cheaper price than the hotel website.

OTA	CHEAPER	SHARE	TYPICAL	VS SEP
Trip.com ★	1,863 of 2,309	81% High	26%	▲ worse was 75%
Agoda ★	1,320 of 2,310	57% High	11%	▼ better was 89%
Booking.com	789 of 2,310	34% High	20%	▼ better was 60%
Hotels.com	745 of 2,258	33% High	7%	▼ better was 79%
Expedia	733 of 2,235	33% High	10%	▼ better was 79%

Hotel booking engine: each OTA

Booking engine searches where Triptease compared each OTA's own site with the hotel website.

OTA	CHEAPER	SHARE	TYPICAL	VS SEP
Trip.com ★	47 of 178	26% Medium	9%	▲ worse was 13%
Priceline	28 of 169	17% Medium	9%	▼ better was 18%
Expedia	20 of 133	15% Medium	10%	same was 15%
Hotels.com	20 of 138	14% Medium	7%	▼ better was 17%
Agoda ★	16 of 181	9% Low	18%	▼ better was 16%
Booking.com	12 of 178	7% Low	22.5%	▼ better was 8%
Traveloka	1 of 146	1% Low	—	▼ better was 16%

Never cheaper than the hotel website: Orbitz, Travelocity, MakeMyTrip. ★ priority OTA for this hotel. Share = how often that OTA was cheaper than the hotel website. The same scale is used for one OTA or all OTAs and resellers together: Low (green) 0–10%, Medium (amber) over 10–30%, High (red) over 30%. A low share can still hide a big gap, so read it with Typical. Last column, compared with September 2026: red ▲ worse = the OTA was cheaper than the hotel website more often (bigger leak), green ▼ better = less often, grey = no change; 'was' shows September's share.

Smaller sites on Google Hotel Ads

Several small sites cheaper by a similar margin usually means a wholesale rate is being resold in public.

GoSeek 1,714 stays, 22% · **HutchGo** 1,568 stays, 20% · **Evendo** 1,247 stays, 24% · **Bluepillow** 872 stays, 23.5% · **Klook** 850 stays, 23%

Key takeaways

1 Close the wholesale leak

For the hotel's revenue team: GoSeek, HutchGo, Evendo and other small sites were 20–24% below the hotel website. The same gap across many resellers points to a leaked wholesale rate. Find which contract holds it and close it.

2 Then Trip.com and Agoda

For the hotel's revenue team: Trip.com was cheaper on 81% of Google Hotel Ads stays and 26% of booking engine searches. That is worse than September, though better than October 2025 (87% and 66%). Agoda was cheaper on 57%. Bring both into line.

3 Explain Metasearch before adding budget

For Triptease: against October 2025, Metasearch cost per click rose from ฿21.52 to ฿40.15 and bookings fell from about 43 to 5. Share October's outbid figures, explain the bidding change and agree a target return with the hotel before adding any budget.

4 Check why fewer clicks book

For the hotel's revenue team: Metasearch conversion fell from 6.82% to 2.19%, yet the typical undercut on Google Hotel Ads narrowed from 36% to 18%. Compare this October's hotel website rates and room availability with last year's.

5 Fix or rethink Retargeting

For Triptease: it used only 4–5% of its budget in September and October and won no October bookings. Fix it, or the hotel moves the budget.

6 Track branded search and the yearly trend

For Contents Pop: branded search's 8x return comes from four bookings by guests who already know the hotel. Contents Pop will track it, and Metasearch against last year, every month before drawing conclusions.

Notes on the data

- Triptease reporting starts 1 October 2026. Earlier months appear only as comparison figures.
- October Metasearch visibility (share of searches shown and outbid) was not in the Triptease export, so we cannot yet tell how much bids or rates held Metasearch back.
- Since January 2026, Metasearch impressions also count Google's free booking links, so click-through rates are not comparable with October 2025. Bookings are weighted (October 2025 Metasearch: 42.6). Priceline was not compared in October 2025.
- Traveloka was not in October's Google Hotel Ads comparison and was cheaper on 1 of 146 searches on its own site. Typical baht gaps by OTA were not reported. With nine bookings, returns by channel can swing widely.
- Recorded prices, not live prices. Budgets are set in US dollars, so baht budgets move slightly with the exchange rate.
