DIRECT BOOKING PERFORMANCE REPORT · SEPTEMBER 2026

# Chateau Du Village Patong

Triptease paid media and rate parity, September 2026. All money figures in Thai baht.

Budget is not what is holding direct bookings back. Less than half of September's budget was spent; the constraints are bids on Google Hotel Ads, where competitors outbid the hotel on over a third of searches, and rate parity, with a cheaper price beside the hotel's own on almost every stay.

September figures come from the Triptease Agent summary; impressions, clicks and bookings by channel were not exported that month. Source: Triptease Agent month-end report, bookings on weighted attribution. Recorded prices, not live prices. Budgets are set in US dollars, so baht budgets move slightly with the exchange rate.

Never cheaper than direct on their own websites: MakeMyTrip, Travelocity, Orbitz. ★ priority OTA for this hotel. Last column: red = undercut more often than the month before, green = less often.

## Smaller sites on Google Hotel Ads

Several small sites cheaper by a similar margin usually means a wholesale rate is being resold in public.

**Evendo** 2,339 stays, 31% · **Klook** 2,229 stays, 31% · **Bluepillow** 2,230 stays, 25% · **eTrip** 2,305 stays, 21% · **GoSeek** 2,268 stays, 21%

## Key takeaways

**1 Do not add budget**
Spending stops at the bids, not the budget, so about ฿11,900 a month of Metasearch budget goes unspent.

**2 Trace the wholesale rate**
Check which wholesale contracts hold a rate 20–30% below the direct price.

**3 Bidding is the Metasearch lever**
Ask Triptease to bid more for the hotel; expect the return to fall from 9.4x as clicks cost more.

**4 Then Agoda and Trip.com**
Both are cheaper on Google Hotel Ads and on their own sites; raise parity with each directly.

**5 Review Paid Search**
It took 88% of September's spend and won no bookings in August or September.

**6 Watch October**
Undercut stays on Google Hotel Ads went from 80% a year ago to almost all.
